TOP FEATURES

1. Genesis 499cc Sport Performance Engine

A clear leader in its class, the lightweight and dependable sport-performance Genesis twin was designed specifically to deliver a quick revving and torque laden power band. An advanced fuel injection system ensures consistent and efficient performance, while a counterbalanced crankshaft results in a smooth and super-crisp throttle response.

2. KYB Aluminum Front Shocks

Premium, aluminum bodied, high-pressure gas shocks deliver consistent performance and comfort with excellent fade resistance. The shocks are also rebuildable, ensuring you season after season of consistent performance with proper maintenance.

3. HPG Rear Shock

High Pressure Gas (HPG) shocks with strong 36mm bodies are calibrated to deliver consistent performance and comfort with excellent fade resistance.

4. Lightweight YZ Style Seat

Inspired from our family of motocross bikes, the lightweight seat is taller and narrower than a traditional snowmobile seat, providing greatly enhanced ergonomics for an active riding experience.

5. Tuner II Skis

Developed exclusively by Yamaha engineers, the Tuner II Ski incorporates a dual keel design that can be calibrated through various runners and carbide lengths for rider preference. The Tuner II Ski dramatically reduces darting and steering effort while retaining predictable and sharp handling characteristics.

6. Pro Mountain 144 Rear Suspension

Designed for maximum flotation, comfort, bump absorption, and flickable ergonomics, the narrowed Pro Mountain 144 rear suspension utilizes a cam-mounted front shock for improved motion ratio, and a rear cantilever system for consistent track tension.

Phazer X-TX

FEATURES & BENEFITS

TOP FEATURES - CONT.

7. 1.5-Inch Freeride Track

Narrowed to complement the nimble and ergonomically friendly cockpit of the Phazer, the crossover X-TX features a versatile Free Ride™ track with 1.5-inch lugs that is equally adept on and off trail.

PERFORMANCE

YXRC Clutching

Featuring Yamaha drive and driven clutching, the lightweight YXRC system delivers smooth engagement, instant acceleration, fast reacting backshift, and cool operating temperatures for a long belt life. Just like its big brother YVXC clutch system, the YXRC is smooth, responsive, and durable.

Wide Running Boards

With its rider active design, narrowed seat, and sculpted cockpit, the Phazer platform touts wide running boards with additional grip for a sure-footed stance.

Rear Exit Exhaust

Often considered a hallmark feature of many Yamaha snowmobiles, the Phazer platform also touts a rear-exit exhaust system that is exposed to the snow under-seat for additional cooling.

HANDLING

Link Type Sway Bar

A standard link-type sway bar keeps the front suspension planted and flat, even in rutted, high-speed turns.

Extruded Aluminum Spindle

Saving weight and creating a nimble and responsive riding experience was at the foundation of the Phazer platform. Extruded aluminum spindles are lightweight yet incredibly strong.

Rider Active Cockpit

From the sculpted seat, wide running boards, and open design of the controls, the Phazer X-TX platform was designed with the rider who like to be "one" with the machine when riding.

COMFORT

Wide, Hooked End Handlebars

No other touch point is more important to a rider than the handlebars. Yamaha bars are flat and wide, engineered for comfort, control, and natural ergonomics. Integrated hooked ends add additional control while cornering, and feature heated grips across that span the entire length.

LED Taillight

The high-intensity LED taillight/brake light is lighter and brighter than a traditional incandescent design, and delivers a significantly longer lifespan.

Digital Gauge with Push Button Reverse

The compact handlebar mounted digital gauge is packed with information and is displayed on a large face, easy to read gauge. In addition, a convenient electric push button reverse is housed within the gauge package and actuates a servo-controlled reverse gear.
