## SRX120

### TOP FEATURES

#### 1. 123cc Yamaha 4-Stroke Engine

The easy to start 123cc genuine Yamaha engine delivers spunky performance and years of rock solid reliability.

#### 2. Tether Switch

An integrated switch automatically shuts-down the engine when ever the driver is not on-board or the hood is lifted open.

#### 3. High Visibility Whip Flag

A standard, rear mount, high-visibility whip flag delivers high-level awareness for those in the area as your youngster hones his or her skills.

#### 4. Torsion Spring Rear Suspension

Just like the big sleds, the SRX120 features a fully-functional slide-rail torsion spring suspension serving up 4.5-inches of travel.

#### 5. Always On Headlight / Taillight

There is no thought required when it comes to visibility. The bright headlight and tail light are automatically always on when the engine is running.

#### White/Red

\$2,899 MSRP\* \$236 Destination Charge\*

#### Racing Blue

\$2,899 MSRP\* \$236 Destination Charge\*

\*Manufacturer's Suggested Retail Price (MSRP) shown. Does not include tax, title, prep or destination charges. Actual prices set by dealer.

## FEATURES & BENEFITS

### PERFORMANCE

#### Governor Speed Control

An easy to adjust governor allows you to control the top speed and acceleration of the vehicle, allowing you to slowly increase the Performance as your child gains confidence and skill.

#### Transistorized Ignition

A full electronic ignition system ensures quick and easy starts, season after season with no adjustments to make.

#### Mechanical Fuel Gauge

Simple to use and easy to see, you will appreciate knowing how much gas is left at a glance.

### HANDLING

#### NEW Plastic Ski

Yamaha designed a new, lightweight plastic ski for the SRX120 based on the size and weight of the smaller chassis. It provides excellent steering character with just the right amount of float for play in the soft stuff.

#### Double Wishbone Front Suspension

Patterned after Yamaha's full-size, the fully functional, double-wishbone front suspension features coil-over shocks and 3-inches of travel.

#### Front and Rear Bumpers

These handy items are a must have feature helping protect the chassis from unexpected bumps and bangs. They also come to the aid when the need to pull around either end of the machine is required.

#### Keyed Ignition

When it comes time to put away the fun, its good to know that the removable ignition key will also take away any temptation to continue to ride without supervision.

### COMFORT

#### Grip Warmers

Parents all know that cold hands can cut a kid's fun short. The SRX120 features stock grip warmers to extend the fun.

#### Plush Wrapped Seat

A contoured, foam-wrapped seat serves up comfort and a secure riding position for increased driver confidence.

#### Padded Handlebar

Padded handlebars help protect the young rider from contacting the bars in the event of a sudden slip or stop.

#### Rear Storage Compartment

The convenient storage compartment comes in handy to have dry mittens or other items available when needed.
