TOP FEATURES

1. 1049cc Genesis 4-Stroke Engine

Yamaha's reliable three-cylinder engine features an advanced Yamaha fuel-injection system for incredibly accurate fuel metering for spot on performance, fuel sipping economy and instant starts, no matter the environment. A broad, flat power-band delivers instant thrust from nearly any speed, and a thick torque curve provides an abundance of power to pull heavy loads all backed by a track record of unstoppable reliability.

2. Electric Power Steering

Yamaha was the first and still the only manufacturer to offer Electric Power Steering to the snowmobile industry. The velocity sensing system delivers maximum assistance at slow speeds to nearly zero assistance at high speeds. Aside from dramatically reducing steering effort, the system reduces negative feedback, helping isolate the driver from unwanted steering effort.

3. Workforce Mirrors

Functional mirrors tout a large viewing area, making it easier to see what lies behind. The mirrors are mounted on the interior side of the protective windshield, shielding them from potential damage.

4. Digital Gauge

An easy to view and operate digital gauge package keeps tabs on all vital engine and vehicle attributes while also delivering added features including hour meter, trip meters, clock and much more.

5. Large Capacity Fuel Tank

Enjoy extended range and expanded work capability with a large fuel tank. The tank boasts of a capacity in excess of 11.6-gallons.

6. Driver's Seat

The VK Professional II EPS seat was specifically designed with driver comfort and convenience in mind. The seat better positions the driver in relationship to the controls, delivers enhanced comfort, and provides easier mounting when getting on and off the snowmobile.

*Manufacturer's Suggested Retail Price (MSRP) shown. Does not include tax, title, prep or destination charges. Actual prices set by dealer.

VK Professional II

FEATURES & BENEFITS

TOP FEATURES - CONT.

7. High Capacity Cargo Rack

Carrying expanded loads, be it for work or play, is one of the core attributes of the VK Professional II EPS. A large cargo rack serves up more capacity and ease of use whether you are hauling supplies to camp, tools to the job site, or fishing gear to the icepack.

PERFORMANCE

Three Speed Transmission

The Hi/Lo transmission with reverse is workhorse one minute, and a versatile trail cruiser the next. With a simple to use manual actuated lever, you can select from "normal" high range for cruising to low range and pull heavy loads.

High Flotation UHMW Skis

Wide skis deliver added flotation when traveling off-trail, while an engineered keel provides predictable handling and easy to steer manners.

Heavy Duty Wrap-Around Bumper

In addition to the work-inspired design, a stout, wrap-around bumper provides protection from the bumps and bangs that come with a day on the job.

HANDLING

Pro Comfort Suspension

This dual-shock, fully coupled suspension features a simple and effective flip-lever torsion spring adjustment to quickly adapt the suspension for one-up or two-up riding, or for hauling a heavy payload. A 40mm, High Pressure Gas (HPG) shock provides exceptional control, fade resistance, and maximum durability.

Camoplast 1.5 Cobra Wide Track

The primary purpose of the 20 x 154 x 1.5" Cobra track is to fully maximize all available snow with confidence-inspiring deep snow flotation and powerful pulling force. The 1.5" lug is perfect for both low-speed or high-load situations that utility sleds often function in.

Gull Wing A-Arm Front Suspension

The unique "curved" front suspension A-arms deliver increased clearance thereby reducing the potential for impact and damage when encountering hidden rocks, stumps, or other debris when navigating off-trail or in unknown terrain.

KYB Gas Cell Shocks

The coil-over front shocks are specifically calibrated for additional loads and off-trail riding, yet still deliver a plush, predictable ride on-trail.

COMFORT

Protective Windshield

A wide, tall, wrap-around style windshield delivers greater protection from the elements as well as unsuspecting tree branches and limbs. The windshield has been wind tunnel tested to reduce unwanted negative swirl and deliver a greater "pocket" of comfort for both driver and passenger.

Standard Electric Start

Seamless and easy to use electric start delivers instant and hassle free starts, no matter the weather, eliminating the need for a pull rope.

Standard Tow Hitch

In addition to a host of on-board creature comforts and storage, a standard factory rear mounted tow hitch is at the ready for additional gear or occasional light-duty work.

Expansive Under-Seat Storage

With a hinged, flip-up seat, the VK Professional II EPS exudes its work ethic at every turn. The large under-seat storage touts an integrated tool kit and room for much more.

Raised Passenger Seat

The wide and plush standard two-up seat provides comfort for two with integrated backrest.
