Grizzly EPS

Armor Gray/Yellow
\$10,499 MSRP* \$460 Destination Charge*

Realtree Edge
\$10,899 MSRP* \$460 Destination Charge*

TOP FEATURES

1. Big-Bore Engine Designed For Trail Riding

The Grizzly EPS brings Yamaha's renowned riding excitement without losing an ounce of comfort, thanks to its potent 686cc engine designed for smooth, quiet running and enhanced midrange power.

2. High Performance Ultramatic® Transmission

Yamaha's class-leading Ultramatic® transmission is proven to be the most durable CVT transmission on the market, combining immediate response with advanced features like natural, all-wheel engine braking for extra control and confidence.

3. Trail-Ready Chassis

With plenty of ground clearance and adjustable suspension, the Grizzly EPS tackles rough terrain with ease. The long-travel shocks, wide-arc A-arms and full-body skid plates ensure the Grizzly EPS is ready to go wherever you are.

4. Yamaha's Exclusive On-Command® 4WD

Unlike so many computer-controlled 4WD systems on the market, the Yamaha On-Command® system keeps the rider in charge. With selectable 2WD, limited-slip 4WD and a fully locked differential 4WD modes, the Grizzly EPS delivers power predictably and consistently.

5. Class-Leading Power Steering

Reduced fatigue, excellent control and trail feel all come standard with the Grizzly EPS' best-in-industry speed-sensitive Electric Power Steering (EPS).

FEATURES & BENEFITS

CAPABILITY

High Performance Ultramatic® Transmission

Grizzly EPS' Ultramatic® transmission features a gated shifter, dual-range (Hi/Lo) drive plus reverse gear, and the industry's most advanced—and durable—CVT drive system. An automatic centrifugal clutch maintains constant belt tension for reduced wear, and a sprag clutch delivers natural all-wheel engine braking.

Exciting Big-Bore Engine

For the trail rider looking for excitement in every ride, the ideal engine should balance strong big-bore power with immediate, responsive midrange. The Grizzly EPS features a potent 686cc engine with power delivery, torque and engine character all optimized for recreational riding.

Yamaha's Exclusive On-Command® 4WD

The three-position On-Command® 4WD system lets you switch between 2WD, limited-slip 4WD and a fully locked differential 4WD, all with the simple push of a button. An override button allows the engine to reach maximum rpm in full differential lock mode.

High-Mounted Air Intake

Tackle mud and water with confidence thanks to the Grizzly EPS' high-mounted air intake layout. The design increases power and torque while providing additional room for on-board storage and easy, tool-less servicing of the foam air filter.

Stainless Steel Exhaust

To maintain clean-running performance for years, the Grizzly EPS uses a stainless steel exhaust system and features a screen-type spark arrestor for great power with minimum noise output.

High-Capacity Radiator

Slow-speed technical riding can place a lot of thermal demands on a liquid-cooled motor, so the Grizzly EPS features a high-capacity radiator that delivers plenty of air flow for maximum cooling efficiency, positioned high in the frame for optimal protection.

Drive System Air Intake

A high-mounted drive system air intake helps reduce drive system temperatures and assists in keeping water and debris from entering the drive case.

High Performance Tires

Maximizing available traction, the Grizzly EPS features 26-inch, exclusively designed Maxxis® tires, providing precise steering feel and feedback.

Four-Wheel Hydraulic Disc Brakes

Powerful and consistent braking comes standard on every Grizzly EPS thanks to four-wheel hydraulic disc brakes with unmatched braking feel.

Generous Ground Clearance

To handle nearly any terrain with ease, the Grizzly EPS offers an impressive 11.3-inches of ground clearance and full-length composite skid plates for maximum underbelly protection.

Adventure Pro-Ready

The Grizzly EPS comes pre-wired for Yamaha's exclusive Adventure Pro® GPS system, unlocking the next level of trail-ready navigation. This state-of-the-art GPS unit combines a range of functions into a single, rugged 7-inch full-color display. Search, download, record and share trail routes with friends. Yamaha's uniquely integrated, multifunctional Adventure Pro® system also provides advanced vehicle data with exceptional clarity.

COMFORT

Independent Double Wishbone Front and Rear Suspension

An independent double wishbone suspension with 7.6 inches of front wheel travel and 9.1 inches at the rear, along with nitrogen-charged shocks offering 5-way adjustable preload, combine to provide excellent rider comfort on even the most challenging trails.

Class-Leading Power Steering

Minimize fatigue and attack every corner with Yamaha's Electric Power Steering (EPS), the industry's best balance of electric steering assist and positive trail feedback.

Underseat Fuel Tank

An optimized 4.76-gallon fuel tank is located under the seat for excellent mass centralization and improved handling.

Plush Saddle

With plenty of room for the rider to move during riding, the long, plush seat improves rider comfort for extended days exploring any trail.

CONFIDENCE

Aggressive and Durable Styling

Rugged composite front bumper resists scratching and won't rust, while injection-molded fenders and CV joint guards protect against rock and debris damage.

LED Headlights and Taillight

LED technology uses less power, creates brighter, sharper illumination and offers lifetime durability. A handlebar-mounted halogen work light provides additional illumination that moves with rider input for excellent visibility.

Ready for Accessories

A range of accessory options were engineered in concert with the Grizzly EPS, offering a variety of performance, convenience, protection and styling enhancements with factory-level fitment and functionality. Comes standard with a 12V power point, so you can keep your devices charged too.

Extensive Cargo Capacity

Rugged, large-diameter steel cargo racks with durable wrinkle paint finish can pack a total of 308 pounds combined (110 lb front, 198 lb rear). Three on-board storage compartments keep things secure.

Work-Ready Tow Capacity

Center-mounted, heavy-duty 2-inch receiver comes standard on Grizzly EPS and can tow up to 1,300 pounds.

Built Real World Tough™, Assembled in the USA

As with other Yamaha ATVs and Side-by-Sides, the Grizzly EPS is assembled in the USA to meet Yamaha's exacting standards for durability and reliability.

10-Year-Belt Warranty

The Grizzly EPS transmission uses its own cooling intake to maintain proper temperatures, an oversized belt to handle the torque of the large motor and Yamaha's unique sprag clutch to maintain constant belt tension. The end result is a drivetrain built for years of trouble-free service that leaves the competition in the dust, and is backed by the industry's only 10-Year V-Belt Limited Warranty.
