## VK Professional II

### Metallic Black

\$13,999 MSRP\* \$515 Destination Charge\*

### Magnetic Bronze

\$13,999 MSRP\* \$515 Destination Charge\*

## TOP FEATURES

### 1. 1049cc Genesis 4-Stroke Engine

Yamaha's reliable three-cylinder engine features an advanced Yamaha fuel-injection system for incredibly accurate fuel metering, spot on performance, fuel sipping economy and instant starts, no matter the environment. A broad, flat power-band delivers instant thrust from nearly any speed, and a thick torque curve provides an abundance of power to pull heavy loads, all backed by a track record of unstoppable reliability.

### 2. Electric Power Steering

Yamaha was the first manufacturer to offer Electric Power Steering to the snowmobile industry. The velocity sensing system delivers maximum assistance at slow speeds to nearly zero assistance and high speeds. Aside from dramatically reducing steering effort, the system reduces negative feedback, helping isolate the driver from unwanted input fed back from the trail.

### 3. Workforce Mirrors

Functional mirrors tout a large viewing area, making it easier to see what lies behind. The mirrors are mounted on the interior side of the Protective Windshield to shield them from potential damage.

### 4. Digital Gauge

Easy to view and operate, the digital gauge package monitors all vital engine and vehicle attributes while featuring the hour meter, trip meters, clock and much more.

### 5. Large Capacity Fuel Tank

Boasting a capacity of 11.6 usg / 44 L, the fuel tank offers extended range and expanded work capability.

### 6. Driver's Seat

The VK Professional II seat was specifically designed with driver comfort and convenience in mind. The seat better positions the driver to the controls, delivers enhanced comfort and provides easier mounting when getting on and off the vehicle.

### 7. High Capacity Cargo Rack

Whether it's for work or play, carrying heavy loads is one of the core attributes of the VK Professional II. A large cargo rack serves up more capacity, making it easier to haul supplies to camp, tools to the job site or fishing gear to the icepack.

\*Manufacturer's Suggested Retail Price (MSRP) shown. Does not include tax, title, prep or destination charges. Actual prices set by dealer.

## FEATURES & BENEFITS

### PERFORMANCE

#### Three Speed Transmission

The Hi/Lo transmission with reverse is a workhorse one minute and a versatile trail cruiser the next. With a simple-to-use manual actuated lever, you can select from “normal” high range for cruising to low range for pulling heavy loads.

#### High Flotation UHMW Skis

Wide skis add flotation when traveling off-trail while the engineered keel provides predictable and easy-to-steer handling.

#### Heavy Duty Wrap-Around Bumper

A stout, wrap-around bumper provides protection from the bumps and bangs that come with a day on the job.

### HANDLING

#### Pro Comfort Suspension

This dual-shock, fully-coupled suspension features a simple and effective flip-lever torsion spring adjustment to quickly adapt the suspension for one-up or two-up riding or for hauling a heavy payload. A 40mm, High Pressure Gas (HPG) shock provides exceptional control, fade resistance and maximum durability.

#### Camoplast 1.5 Cobra Wide Track

With confidence-inspiring deep snow flotation and powerful pulling force, the 20" x 154" x 1.5" Cobra track maximize all available snow. The 1.5" lug is perfect for those low-speed or high-load situations.

#### Gull Wing A-Arm Front Suspension

The A-Arm front suspension features an unique curve that increases clearance which reduces the risk of impact and damage when encountering hidden rocks, stumps or other debris when navigating off-trail or in unknown terrain.

#### KYB Gas Shell Shocks

The coil-over front shocks are specifically calibrated for additional loads and off-trail riding while still delivering a plush, predictable ride.

### COMFORT

#### Protective Windshield

A wide, tall, wrap-around windshield delivers great protection from the elements as well as unsuspecting tree branches and limbs. Tested in wind tunnels, the windshield reduces unwanted, negative swirl and delivers a greater “pocket” of comfort for all riders.

#### Standard Electric Start

The seamless and easy-to-use electric start delivers instant and hassle-free starts, no matter the weather, eliminating the need for an “old-school” pull rope.

#### Standard Tow Hitch

The standard factory rear-mounted tow hitch is ready for any additional gear or occasional light-duty work.

#### Expansive Under-Seat Storage

Under the hinged, flip-up seat, the large under-seat storage touts an integrated tool kit and room for much more.

#### Raised Passenger Seat

With an integrated backrest, the wide and plush standard two-up seat provides maximum comfort for two.
